

Question:

Summarize the paper in a few sentences.

Answer:

Here is a summary of the paper in a few sentences:

The authors develop a novel rubric to assess the exposure of occupations and tasks to large language models (LLMs) such as OpenAI's Generative Pre-trained Transformers (GPTs). They apply this rubric using both human annotators and GPT-4 itself. The results show that LLMs have the potential to significantly impact a diverse range of occupations within the U.S. economy. The authors find that around 80
